

TECHNOMIG 180 DUAL SYNERGIC 230V EURO

cod. 816054

Microprocessor controlled MIG-MAG/FLUX/BRAZING inverter wire welding machine. Technomig is confirmedas the perfect solution for a wide range of applications, from maintenance to installation and interventions in body shops, because of its flexibility and the different materials it can weld (steel, stainless steel, aluminium), or braze weld (galvanized sheet). The fast SYNERGIC adjustment of the welding parameters thanks to the "ONE TOUCH" technology, makes the product very easy to use. Just set the material thickness and start welding: the intelligent and automatic control of the arc,moment by moment, maintains high welding performance in all working conditions, with different materials and/or gases. The operator can also intervene manually along the arc length: this adjustment means the weld seam can be modified according to the welder's style. Lightweight and verycompact, Technomig can be moved around easily in all intervention areas, both indoors and outdoors. Main features: Torch Euro connection * polarity change for GAS MIG-MAG/BRAZING welding * synergic adjustment with setting only of the material thickness * fine adjustment of the arc length * 10 synergy curves available * compact and light * thermostatic, overvoltage, undervoltage, overcurrent,motorgenerator (+/-15%) protections. Fit for NO GAS/Flux welding, it can be transformed into MIG-MAGwith the optional kit. Complete with MIG-MAG torch, work clamp and cable.
